

INVESTMENT MANAGEMENT PHILOSOPHY

The TFCM Israeli Innovation Strategy adheres to the same disciplined process that is applied to our flagship Core Growth Strategy and our narrative-based approach, which has been deployed by the principals of Taylor Frigon Capital Management (TFCM) for almost three decades. Over that period of time, Israeli companies have possessed unique characteristics of solid core growth companies, especially in the areas of core technology, healthcare and biotechnology, and are therefore an integral part of our overall investment strategy, but are concentrated in our Israeli Innovation Strategy.

ISRAEL: A CULTURE OF ENTREPRENEURSHIP

Israel is a nation of problem solvers whose perseverance and optimism embody a culture of entrepreneurship unparalleled anywhere else in the world, save the much larger Silicon Valley.

- A global leader in R&D investment and home to global R&D centers (Intel, IBM, Microsoft, Apple)
- There are more Israeli companies listed on NASDAQ than India, Japan and Korea combined.
- Developed some of the most impressive technologies ever produced – too many to list here.

Israel continues to fit many of our narratives, furthering the “core technology” that TFCM believes will open new markets and solve the world's big problems.

PERFORMANCE/GROWTH OF \$100,000 SINCE INCEPTION 12/31/2015²

³ Source: FactSet PA; Benchmark SPDR S&P Mid Cap 400 ETF Trust. These statistics are based on a composite of actual portfolios.

⁴ Source: FactSet SPAR; Benchmark: S&P Mid Cap 400 - Gross Return. These statistics are based on GIPS compliant gross-of-fees monthly composite returns.

Definitions: **Std Dev:** A statistical measure of the degree to which an individual portfolio return tends to vary from the mean, based on the entire population. The greater degree of dispersion, the greater degree of risk. **Treynor Ratio:** Measures reward per unit of beta risk. The numerator of this ratio is the difference between the portfolio annualized return and the annualized return of the risk free instrument (T-Bills). The denominator is the portfolio's beta. **Sharpe Ratio:** A risk-adjusted measure that measures reward per unit of risk. The higher the Sharpe Ratio, the better. The numerator is the difference between the portfolio's annualized return and the annualized return of a risk-free instrument. The denominator is the portfolio's annualized standard deviation (population). **Beta:** The systematic risk of a portfolio. The beta of a portfolio is its sensitivity to a benchmark. A portfolio with a beta of 1 is as risky as the benchmark and would therefore provide expected returns equal to those of the market during both up and down periods. A portfolio with a beta of 2 would move approximately twice as much as the benchmark. **Alpha:** The standard intercept. Alpha is a risk (beta-adjusted) return measurement. If two managers had the same return, but one had a lower beta, that manager would have a higher alpha.

GIPS COMPOSITE REPORT

GIPS® compliance indicates that a firm adheres to the overall guiding principles of the GIPS® standards: fair representation and full disclosure of a firm's investment performance. Participation in GIPS® is voluntary and regulators do not require investment management firms to follow it, signifying that those firms who undergo this process are truly committed to reporting and performance excellence.

NA - Information is not presented due to an insufficient number of portfolios in the composite period. In addition, the three-year annualized ex-post standard deviation of the composite and the benchmark are not presented because 36 monthly returns of the composite are not available.

Israeli Innovation Composite contains fully discretionary Israeli Innovation Strategy accounts which invest primarily in 10-20 Israeli growth stocks with small components of cash, and for comparison purposes is measured against the NASDAQ, S&P 600 SmallCap, S&P 500 and S&P 400 Midcap indices. In May 2020, due to licensing issues, the MSCI World All Cap was removed as a comparable index. In June 2018, upon review of indices used for comparison in TFCM composites, it was determined that the S&P 400 Midcap would be a more adequate index than the Russell 2500. Subsequently, we have retroactively to inception changed from using the Russell 2500 to the S&P 400 Midcap as comparison index for this composite. The S&P 400 Midcap Total Return is an unmanaged index consisting of 400 domestic stocks. To be included in the index, a stock must have a total market capitalization that ranges from \$1.4 billion to \$5.9 billion at the time of addition to the index. S&P 600 SmallCap Total Return is an unmanaged index consisting of 600 domestic stocks chosen for market size, liquidity and industry group representation. The index has dividends reinvested in its value. It is a market-value weighted index with approximately \$8 billion indexed to it.

The Israeli Innovation Composite was created on 12/31/2015. In order to maintain continuity in the IIS composite in its first year (2016), TFCM asset weights the individual portfolio returns daily. Thereafter, beginning January 2017, TFCM asset weights individual portfolio returns monthly.

Taylor Frigon Capital Management, LLC (TFCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TFCM has been independently verified for the periods 01/19/2007 through 12/31/2015 by Ashland Partners LP, and for 01/01/2016 to 12/31/2019 by ACA Performance Services LLC. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

TFCM defines itself for GIPS purposes as an independent registered investment adviser with the Securities and Exchange Commission. For purposes of applying the GIPS standards, TFCM GIPS-defined firm does not include private equity investments. The firm's list of composite descriptions is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm and past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual management fees. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. The investment management fee schedule for the composite prior to 2017 was 1.25% on the first \$5 million and 1.00% after \$5 million, with a minimum of \$15,000.00 annually. As of January 2017, management fee schedule is 1% with a minimum \$50,000 annually. Actual investment advisory fees incurred by clients may vary. The MSCI World All Cap Gross Dividend Reinvested Index captures large, mid, small and micro cap representation across 24 Developed Markets (DM) countries. With 11,332 constituents, the index is comprehensive, covering approximately 99 percent of the free float-adjusted market capitalization in each country. The Gross total return indices reinvest as much as possible of a company dividend distributions. The unmanaged indices do not reflect fees and expenses and are not available for direct investment.
