

INVESTMENT MANAGEMENT PHILOSOPHY

We invest client assets in outstanding companies with excellent growth or income prospects. To find them, we bring a rigorous analytical approach to our investment selection process, employing both qualitative and quantitative research techniques. We invest for the long term, but maintain disciplined risk management and sell criteria in the construction and management of client portfolios.

With the **Income Strategy**, we consider **debt and equity** of companies with **strong cash flows and healthy balance sheets**. We strive to own companies with growing and/or **above-average dividend payments**. We seek out investments that represent **extraordinary value**, while also providing a **steady stream of cash flow** to our client.

NA - Information is not presented due to an insufficient number of portfolios in the composite period. In addition, the three-year annualized ex-post standard deviation of the composite and the benchmark are not presented because 36 monthly returns of the composite are not available.

*Cumulative (non-annualized) since inception date: 03/31/07

Preliminary pending examination by ACA Performance Services LLC

Income Composite contains fully discretionary Income accounts. This composite invests in corporate government debt investments as well as preferred stock and to a lesser extent dividend paying common stock. This composite may also hold positions in fixed income and adjustable closed end investment companies. It holds about 20 - 40 securities that are mostly domestic but can hold some foreign shares.

The Combined Index (S&P 500 10%, U.S. 91-Day T-Bill Index 10%, ML High Yield Master II 40% and the ML US Domestic Master 40%) has been applied retroactively as of 6/30/12 and the returns are rebalanced on a monthly basis. This combined index is meant to be considered in the aggregate as opposed to individually since components of the strategy employed may include securities that resemble these indices but to varying degrees. The Income Composite was created 03/31/2007.

Taylor Frigon Capital Management, LLC (TFCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TFCM has been independently verified for the periods 01/19/2007 through 12/31/2015 by Ashland Partners LP, and for 01/01/2016 to 12/31/2016 by ACA Performance Services LLC. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards.

TFCM is an independent registered investment adviser. The firm's list of composite descriptions is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm and past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual management fees. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. The investment management fee schedule for the composite prior to 2017 was 1.25% on the first \$5 million and 1.00% after \$5 million, with a minimum of \$15,000.00 annually. As of January 2017, management fee schedule is 1% with a minimum \$50,000 annually. Actual investment advisory fees incurred by clients may vary.

The Merrill Lynch US Domestic Master index is a capitalization weighted aggregation of outstanding U.S. treasury, agency and supranational, mortgage pass-through, and investment grade corporate bonds meeting specified criteria. This version is the total return version where dividends are reinvested into the index value. The Merrill Lynch High Yield Bond Master II Index is an unmanaged index that tracks the performance of below investment grade U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market. The unmanaged indices do not reflect fees and expenses and are not available for direct investment.

INCOME STRATEGY

For clients who may need more safety or income, we add an appropriate mix of less volatile, higher-yielding securities. We consider corporate equity, preferred and debt securities and REITs as well as government and municipal fixed income instruments. Our objective is to maximize income and minimize risk without sacrificing potential price appreciation.

INCOME SELECTION PROCESS

For the income component of client portfolios, we consider debt and equity of companies with growing cash flows and strong balance sheets, combined with histories of dividend increases. When utilizing bonds, preferred equity or convertibles we generally take positions in issuers who demonstrate a sufficient ability to cover their liabilities with cash flow.

An important consideration in the construction of our Income Strategy portfolio is the diversification of income streams. We focus on strategically allocating capital amongst different industries/sectors so the economic sensitivities of one group will offset those of another, thereby reducing volatility in the underlying value of the portfolio while maintaining the income stream. While clearly a cornerstone of any income investment strategy is a "fixed" income stream, we believe most income investors overstate it in their portfolio and as a result subject their wealth to an undue level of interest rate and inflation risk. We certainly view fixed income instruments as key to the Income Strategy, but we also believe in exposure to "variable" income streams including those that have a propensity to rise (i.e. common dividends). The Income Strategy is "value oriented" in that we are looking to buy streams of cash flow as cheaply as possible.
